HENRI LLOYD

INTELLIGENT INNOVATION

PRO // 4-7

OFFSHORE // 9-11

RACING // 12-15

INSHORE // 16-17

FOOTWEAR // 18-19

No matter what type of sailing you enjoy, whether you race to win or simply enjoy adventure on the water, we have products for you that deliver exceptional performance.

For over half a century our product teams have obsessed about setting new standards for product innovation and quality, testing each piece to the extreme.

Our obsession with quality and innovation continues today as we work globally with industry experts and pioneers to develop the next generation of technology.

OFFICIAL TECHNICAL CLOTHING SUPPLIER
TO THE BRITISH CHALLENGER FOR THE
35TH AMERICA'S CUP

LAND ROVER 

WHEN IT REALLY COUNTS, YOU CAN COUNT ON HENRI LLOYD.

When the nearest people to you (besides your fellow crew members) are the astronauts on the International Space Station and you find yourself alone in the freezing waters of the North Pacific, you need gear you can count on to keep you alive.

This was the situation Andrew Taylor was confronted with during the last Clipper Round the World Race 13/14 when he was overboard for 90 long minutes before his rescue.

Fortunately this is a rare occurrence, but as Andrew discovered this is when you discover the importance of a waterproof seam. Ever since Mr Henri invented the hand taping of seams over half a century ago we have been obsessed about waterproof integrity and the quality of our taping - it really can be the difference between life and death.

Ocean Pro - Real Extreme Protection.

TP FABRICS

TRANSOCEAN

Waterproof, windproof and highly breathable, TP3 features state of the art Japanese coating technology for Offshore sailing. Its lightness and flexibility belies the true durability and waterproofness.

FREEDOM

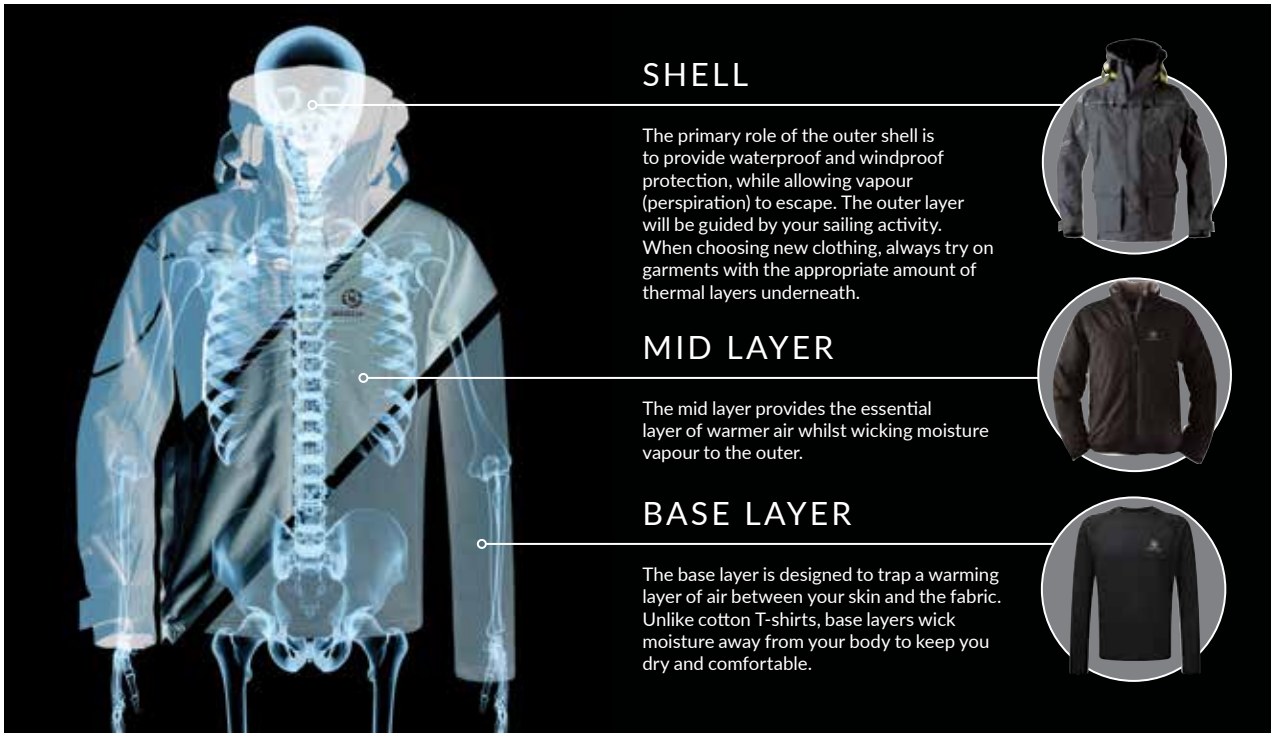

High performing TP2 fabric featuring cutting edge Japanese Bi-Component Coating Technology. 100% Waterproof, Windproof and Highly Breathable.

WAVE

Our tried and tested TP1 fabric technology uses state of the art Japanese Bi-Component coating technology that keeps water out and lets perspiration escape.

THE THREE LAYER SYSTEM

TECHNOLOGY GUIDE

Breathable fabric to keep the wearer dry and comfortable for longer.

Highly breathable fabric reduces internal condensation to keep the wearer dry and comfortable for longer. Fabric transports both vapour and moisture.

Extremely breathable fabric reduces internal condensation to keep the wearer dry and comfortable for longer. Fabric transports both vapour and moisture.

Garments designed to be shaped to your body allowing easier movement and increased comfort.

Fabric is coated with a durable water repellent finish that helps shed surface water, giving a faster return to dry weight.

Garments designed using highly flexible fabrics for increased freedom of movement.

No secondary linings give lighter garments, increased comfort and breathability with reduced inter layer binding and drying times.

Garments have reinforcement fabric at critical areas of high abrasion.

Extremely fast drying fabrics with a quick return to dry weight.

Garments that transport the wearer's body moisture out over a high surface area to accelerate drying time.

Garments are fully windproof.

Garments are fully waterproof.

Fabrics with a built in barrier to protect your skin by reducing the harmful effects of the sun's rays.

Special heated backing tape applied to garment seams to provide total protection against water penetration.

Seams that are sewn flat mean less bulk and less chance for abrasion against skin.

Garments are water resistant.

Garments are wind resistant.

Exclusive to Henri Lloyd, this hood system gives excellent peripheral vision in racing and cruising situations. Perfect for windward or leeward vision pre-start or rounding the marks to give you that all important tactical advantage.

Antimicrobial finish with odour control. Silver ions in the fabric stop bacteria from forming.

TRANSOCEAN

TRANSOCEAN JACKET
Y00350 S-XXL

NRD

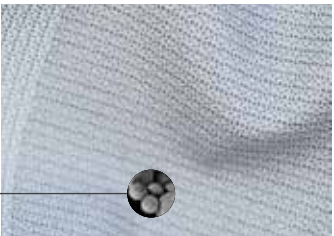

BLK
TRANSOCEAN HI-FIT
Y10158 S-XXL

Transocean has been engineered from our latest waterproof, windproof and highly breathable TP3 state of the art Japanese coating fabric technology for Offshore sailing. The lightness and flexibility of this product belies its true durability and waterproofness.

Firstly the face fabric is created from a tough yet light nylon yarn, that is densely woven into a smooth tight face fabric to deliver a flexible yet durable outer. Secondly a bi-component hydrophilic and microporous coating is applied to the fabric to keep water out yet allows perspiration in the form of vapour and condensation to be transported to the outside and evaporate. Finally a layer of anti-abrasion 3D microbeads are added to protect the coating and create a dry touch lining for comfort.

In addition a saltwater abrasion resistant DWR (Durable Water Repellent) Finish helps shed water maintaining performance and comfort for the wearer.

Anti-abrasion 3D microbeads are added to protect the coating and create a dry touch lining for comfort.

THE WORLD'S FIRST
HIGH PERFORMANCE DECK
TRAINER WITH SEAMLESS
TECHNOLOGY FOR A HIGH
COMFORT SUPER
FLEXIBLE FIT.

When we introduced the Octogrip Mono last year it was met with rave reviews.

The tried and tested non-marking Octogrip outsole delivers unsurpassed grip in wet conditions whilst still allowing the wearer to maintain the sensation of close contact with the deck. The new seamless upper has eliminated the need for stitching which gives two outstanding benefits.

Firstly it creates a supple yet stable upper that is incredibly comfortable to wear and yet due to the materials and technology (all oxygen is eliminated from the mouldings) they have minimal "wetting out" so dry time is quicker.

Secondly, as stitching has been eliminated in the fore-part of the shoe and the facings they are extremely durable especially when worn on aggressive deck surfaces.

FAST-DRI - STAY DRY AND FRESH

The HL Fast-Dri range of products has been developing over two decades. They are hi-wicking, fast drying next-to-skin essentials that also offer Aussie Rules SPF50 sun protection even when wet and even in white!

The achilles heel of synthetic polos and T's has always been the "odour" factor.

The Silver ion anti-microbial treatment originally developed for surgeons gowns to stop infections, attacks the DNA of bacteria to stop it dividing and multiplying. This keeps you fresh even in hot and damp environments. Add easy care to the list and the Fast-Dri range is essential for any outdoor activity or travelling.
