PROTECTING YOUR BUSINESS & THE PLANET

A dump truck of textile waste enters landfill every second.

Only 1% of clothes are recycled effectively.

3 out of 5 t-shirts made today will enter landfill within 12 months

WITH OUR PROGRAMME...

Zero to landfill policy.

Every tonne of textiles recycled saves 3.62 cubic metres of landfill space.

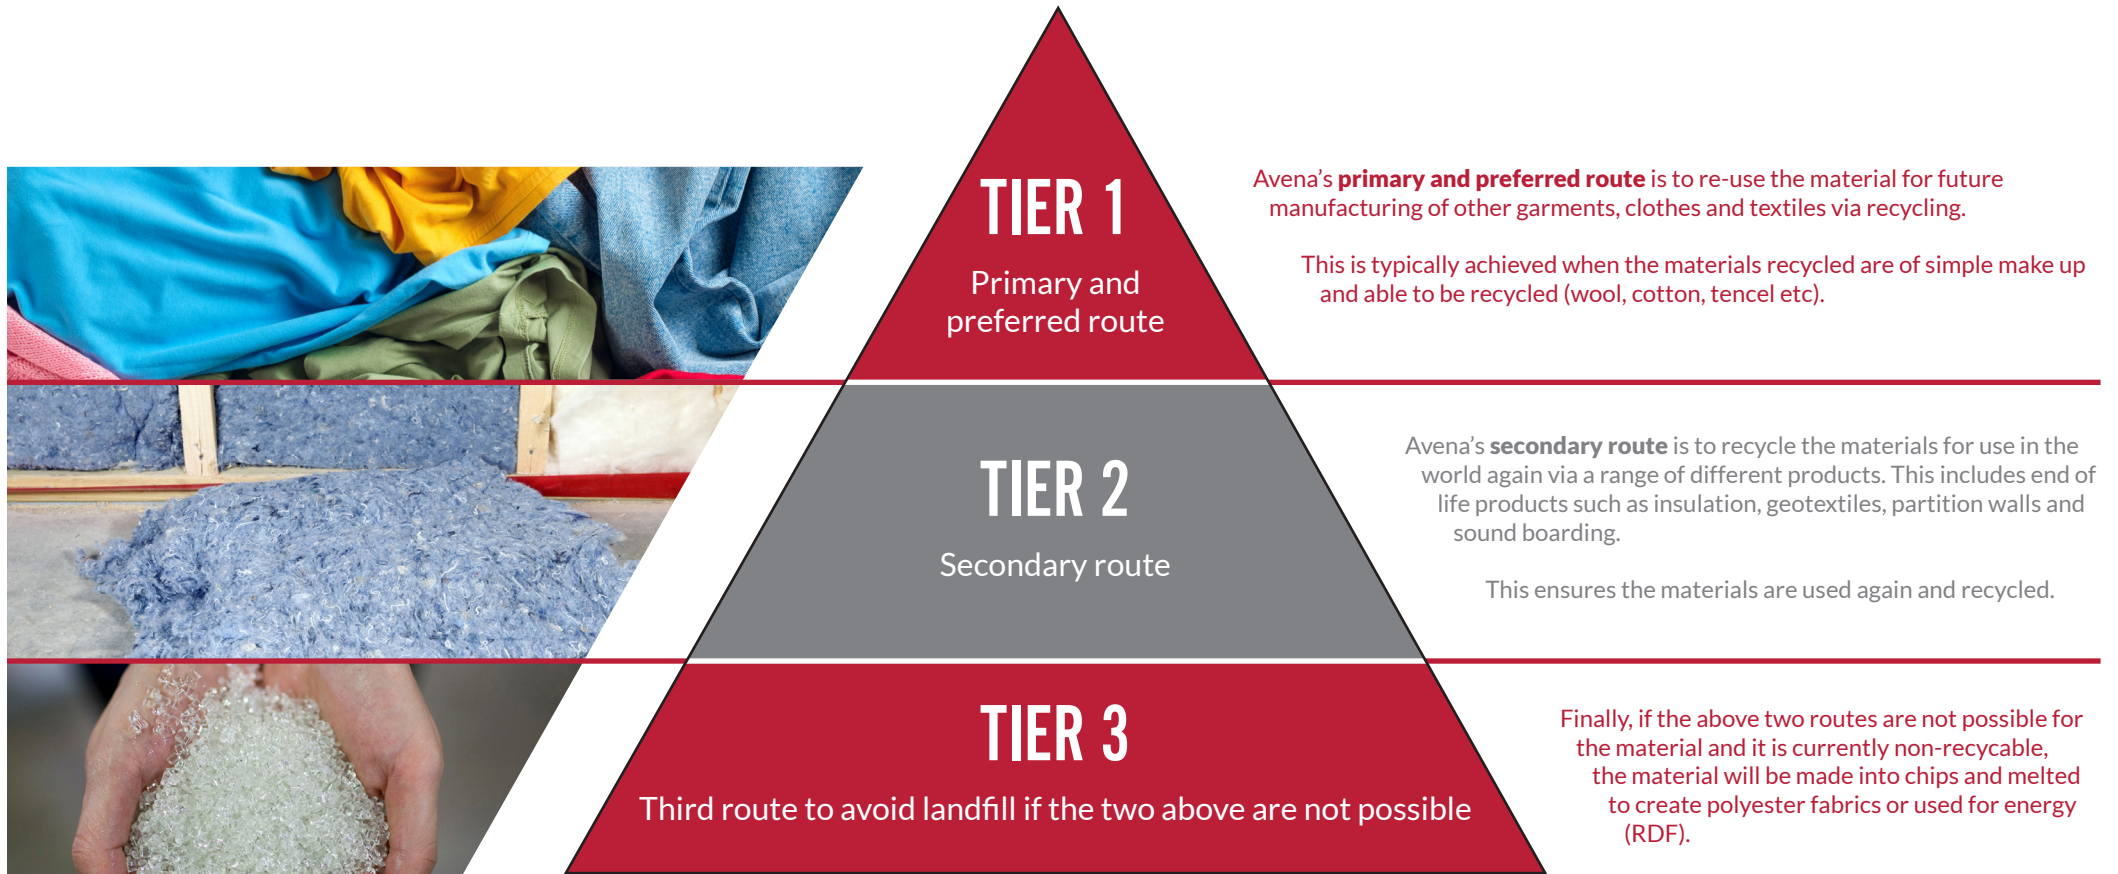

Every tonne of textiles recycled saves 1 tonne of CO₂.

Traceability of your end-of-life uniform

Regular reporting of your environmental impact.

TMD ENVIRONMENTAL

The Avena process separates materials from garments taken so that the amount recycled is maximised, dependant on the material the garment/textile is made from

OUR RESPONSIBILITY

SECURITY

We take security seriously at TMD, we are always looking to improve our systems to ensure we are always providing our clients the most secure service when returning end-of-life garments. Our service partner, Avena, performs DBS checks on all customer service representatives.

They drive unmarked vehicles fully installed with 24/7 CCTV and satellite tracking for your security.

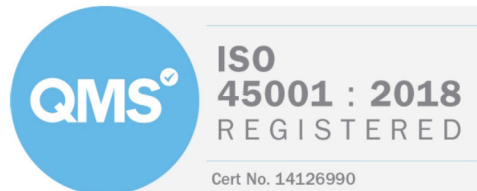

- Compliant with BS EN: 15713-2009 code of practice
- Accredited with ISO 9001
- BS 7858 vetting standard
- A certificate of destruction will always be provided

ENVIRONMENTAL

While security and confidential brand shredding is our focus, we take great pride in continually working towards enhancing the value of your brand through sustainability.

We have ensured Avena's working procedures are designed to positively contribute to our environment.

- Accredited with ISO 14001
- All paper is recycled within the UK
- Making paper from recycled materials reduces greenhouse gases by 70%

Management Information Report for Collection Weights and Recycling Rates

Summary
In the quarter ended 31 December 2020, a total of 39 collections were made and a total of 5,100kg of textile materials were collected and recycled using the Avena service, with a 72% recycling rate.
A total of 1,700kg of CO2 has been saved from entering our atmosphere by using the Avena Textile Destruction and Recycling service compared to disposal by landfill or incineration. In addition, an estimated 5,200,000 litres of water has been saved by aiding the manufacturing process of future textiles.

EXAMPLE STATEMENT

Management Information Report for Collection Weights and Recycling Rates Summary.

In the quarter ended 31 December 2020, a total of 39 collections were made and a total of 5,100kg of textile materials were collected and recycled using the TMD-Avena service, with a 72% recycling rate.

A total of 1,700kg of CO2 has been saved from entering our atmosphere by using the TMD Textile Destruction and Recycling service compared to disposal by landfill or incineration.

In addition, an estimated 5,200,000 litres of water has been saved by aiding the manufacturing process of future textiles.

SERVICE OPTIONS

TMD SERVICED RECYCLE BINS

Client to arrange for End-of-Use Textiles to be sent to TMD for recycling within its own programme.

TMD to collect from client when requested to bring End-of-Use Textiles back to TMD for recycling within its own programme.

The client would be invoiced directly by TMD at the rates described in slides 9 and 10, Options 1 & 2.

SCHEDULED SERVICE AT SITE

A textile bin can be positioned on site with a scheduled service organised at the frequency required by the client. This would typically be fortnightly, monthly or bi-monthly. The client would be invoiced directly by TMD under TMD's Partner agreement at the rates described in slides 11-13, Options 3 to 5.

FULL AUDIT TRAIL AND DESTRUCTION DOCUMENTATION

All prices quoted include the full audit trail and destruction documentation working to BSEN 15713 incorporating the security shredding codes of practice. A certificate is then issued to prove that your waste has been securely destroyed and recycled.

The system is a 'total-shred' system for all the waste textiles produced by the company. This protects against a security risk where something could get into the general waste stream in error and by implementing our programme there is no textile waste going to landfill.
